PROFESSIONAL SUMMARY

GenAI-focused engineer with hands-on expertise in RAG pipelines, LangChain, Qdrant, Google Gemini, and Llama 70B, currently pursuing a B.Tech in Artificial Intelligence. Combines strong algorithmic foundations (Leetcode - 1370) with full-stack execution to deliver context-aware, production-grade AI applications

EDUCATION

Bachelor of Technology (Artificial intelligence) 2024 - 2028
Newton School of Technology, Rishihood University Grade: 7.65/10.0

Intermediate (Class XII) 2023 - 2024
Rahul Ma Shikshan Sansthan Sr. Sec. School, Jaipur, Rajasthan Grade: 75.6%

Matriculation (Class X) 2021 - 2022
Rahul Ma Shikshan Sansthan Grade: 88.0%

PROJECTS

Cadenza (Github) (Demo) June 2026

An ultimate scrollytelling web application utilising advanced **LLM**s and procedural algorithms for end-to-end music production, lyrics generation and mastering.

1. Procedural beat and instrumental stem generation
2. Ultra-fast lyrics generation using **Groq** LLMs.
3. In browser vocal recording AI Vocoder
4. Interactive 3D dashboard with **Three.js**
5. Techstacks used: **Next.js, Groq API, Three.js, Web Audio API, Tailwind, Neon Postgres**

Nexus.GG (Github) (Demo) May 2026

Full-stack gaming companion application utilising **LLM**s to provide personalised e-sports coaching and telemetry analysis.

1. Engineered a highly interactive, responsive gamified dashboard featuring 3D holograms and micro-animations using **Three.js** and **Framer Motion**.
2. Automated the generation of personalised daily training checklists and weakness reports by processing raw match history telemetry through the **Google Gemini API**.
3. Designed a scalable relational database with **Supabase**, implementing custom **PostgreSQL** triggers to automatically manage state initialisation and resolve cold-start issues.
4. Built a robust **Node.js** backend to securely proxy AI inference calls, managing API rate limits and providing graceful fallback mechanisms for failed requests.

KavyaJain Portfolio (Github) (Demo) April 2026

This is a highly interactive, 3D-integrated, cyberpunk-themed portfolio built to showcase my expertise in Generative AI pipelines, modern web development, and immersive **UI/UX** design.

1. 3D Interactive Hero Section: Custom-loaded and optimised **FBX** 3D robot model that tracks cursor movement using **Three.js**.
2. Cyberpunk Aesthetics: Glassmorphism UI, custom neon glows, animated grid backgrounds, and a cohesive dark-mode theme.
3. Performant Animations: Butter-smooth page transitions, staggered reveals, and scroll animations powered by **Framer Motion**.
4. Responsive Layout: Carefully tuned for mobile, tablet, and desktop viewing without compromising the complex **UI** elements.
5. Serverless Ready: Built with **Next.js** 14 App Router, fully optimised for **Vercel** deployment with rapid edge-caching.

CERTIFICATIONS

GDG UI/UX Workshop GDG Rishihood (Link) February 2025

- Completed a comprehensive UI/UX design program with Google Developers Group, gaining hands-on experience in user-centered design principles and best practices.
- Learned to create intuitive, accessible, and aesthetically pleasing interfaces, enhancing user experience across digital platforms.

Mastering Excel SkillEcted (Link) November 2024

Data organisation, charts, formulas & analysis

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, SQL
Courses: Data Structure
Databases & Data Tools: MongoDB, MySQL, Tableau
AI / ML: LangChain, LangGraph, n8n Introduction
Cloud & DevOps: Git and Github
Frameworks & Libraries: Next.js, Node.js, NumPy, Pandas, React, Tailwind, Tailwind CSS

EXTRA-CURRICULAR ACTIVITIES

- Represented my school in the **Inter-School Kho-Kho Championship** held in Jaipur.
- Achieved **3rd place** with the team, demonstrating teamwork, discipline, and competitive spirit.
